

This image will be the correct size to crop to 1400px wide by 1050px high. It does not need to have any black background.

Select crop tool and change settings to width 1400px, height 1050px and resolution to 72 pixels

The resized image will appear much smaller on your screen but will be fine when projected

Save your image as a JPEG. Always select the large file option (Quality 12) and select Baseline ("Standard")
